🇪🇸 **Spanish Nationality**

PROFESSIONAL SUMMARY

Results-driven Fullstack Developer with hands-on production experience building scalable B2B web applications for the event management, hospitality, and administrative sectors. Proficient in modern frontend frameworks (React.js, Angular) and robust backend ecosystems (Spring Boot, Symfony). Proven track record of designing RESTful APIs, optimising relational database performance (PostgreSQL, MySQL), and reducing application load times. Adept at translating complex business requirements into efficient, maintainable, and production-ready technical solutions.

TECHNICAL SKILLS

Frontend	React.js, Angular, JavaScript (ES6+), HTML5, CSS3, Figma
Backend	Spring Boot, Java, Symfony, Python
Databases	PostgreSQL, MySQL, Hibernate, DBeaver
DevOps & Tools	Docker, Git, GitHub, Linux/Bash, AWS, Postman, CORS
Methodologies	Agile, Scrum, REST API Design, CI/CD

PROFESSIONAL EXPERIENCE

Fullstack Developer — Feb 2025 – Dec 2025

CodeArts Solution S.L. · Remote (Huelva, Spain)

- Engineered and deployed multiple B2B web applications, including a comprehensive **event management platform** (sports & artistic events) and a **billing & invoicing system** for administrative companies.
- Designed and implemented **RESTful APIs** ensuring seamless frontend-backend communication, significantly reducing data retrieval and application load times for restaurant and corporate clients.
- Developed reusable, high-performance UI components using **React.js and Angular**, enhancing user experience across multiple client portals.
- Architected and managed relational databases (**PostgreSQL**), optimising complex queries for efficient large-scale data processing.
- Maintained code quality and version control using **Git/GitHub** in an Agile/Scrum team environment.

KEY TECHNICAL PROJECTS

Full-Stack E-Commerce Platform & Admin Dashboard

React · Spring Boot · MySQL · Docker · Hibernate · Figma · Postman

- Developed a complete e-commerce solution with customer-facing storefront and secure admin panel for inventory and order management.
- Implemented backend business logic with **Spring Boot and Hibernate**, ensuring secure data transactions and robust API endpoints validated via Postman.
- Containerised the full application stack using **Docker** and designed UI/UX wireframes in **Figma** translated into responsive React components.
- *Awarded an outstanding academic grade of **8/10** by the evaluation board.*

EDUCATION

Higher Technician in Web Application Development — Oct 2022 – Jun 2025

*Cesur, Málaga (Spain) · Final Grade: **8.08** / **10***
